Portfolio Factsheet – December 2022

Production date: 31st December 2022

Objectives and Investment Strategy

Objectives

The portfolio aims to provide long term capital growth.

Return: Outperform the S&P 500 over the long term*

Risk: Maintain an eToro Risk Score¹ of less than or equal to 5

Current eToro Risk Score¹: **5**

Investment Policy

The portfolio will only invest in stocks and ETFs.

This is a long-only portfolio and leverage will not be used.

The portfolio will be relatively concentrated, holding approximately 20-30 stocks at any one time. No more than 10% will be invested in a single stock, ensuring the portfolio does not become too concentrated.

Investment Strategy

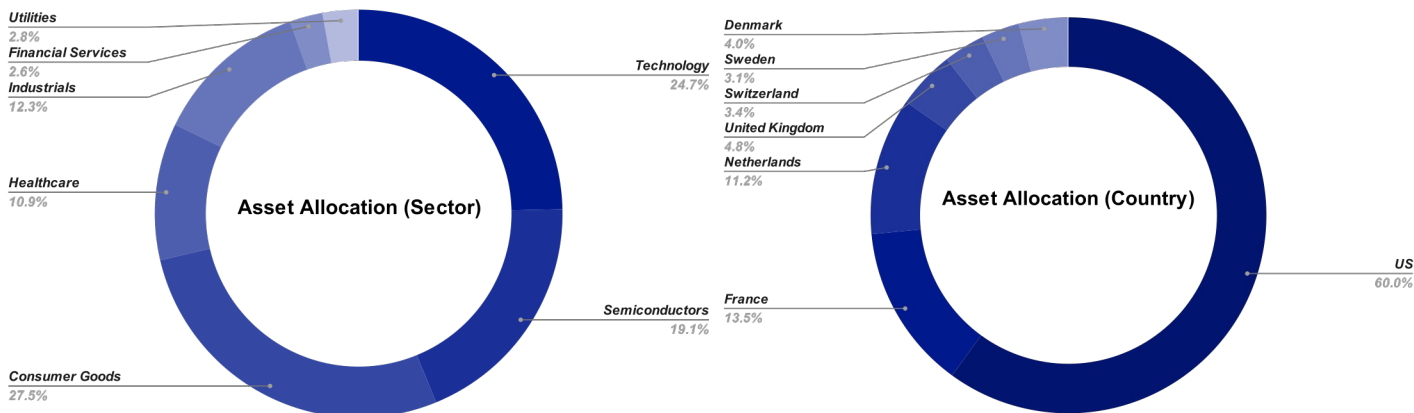

Investments will focus predominantly on long-term trends in technology and strong consumer brands.

A small proportion of the portfolio may also be invested in thematic equities, such as renewable energy or other industries to provide some diversification.

Stock selection will favour **high quality, ESG-friendly** companies with a significant competitive advantage and with the potential to grow their revenues and earnings over many years.

These companies will have the ability to maintain high margins and earn sustainably high returns on their capital, reinvesting their profits to compound their returns over time.
